ORIENTATION PATTERN 2008 Printed carpet, variable dimensions

The four directions - North, South, East and West - multiplied as a pattern puzzling the sense of orientation.

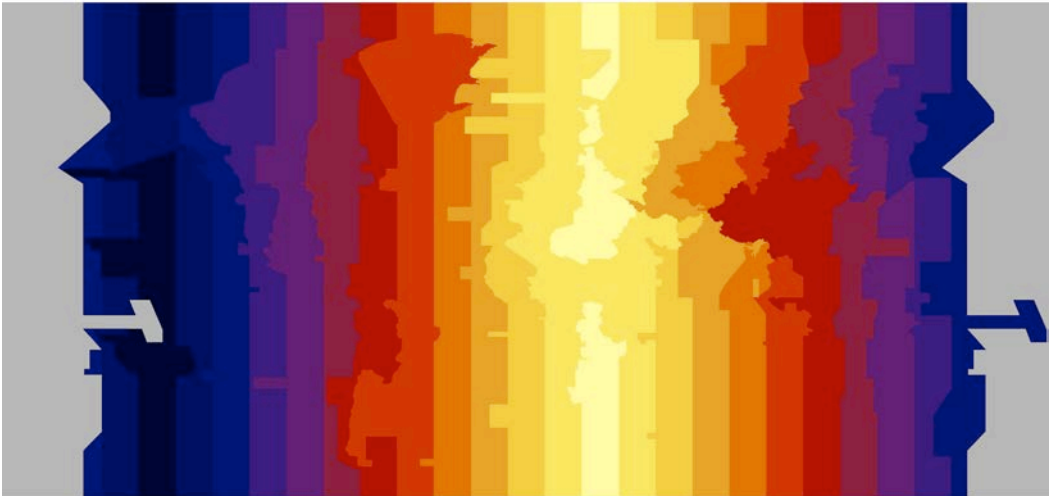

Combinations of timezones and colors related to the letters of the alphabet in order to write a given time in a given place.

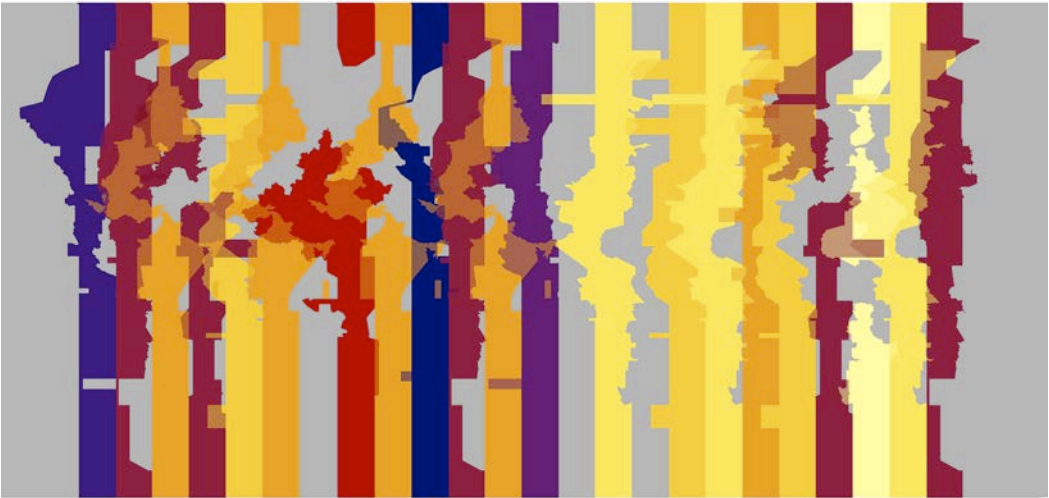

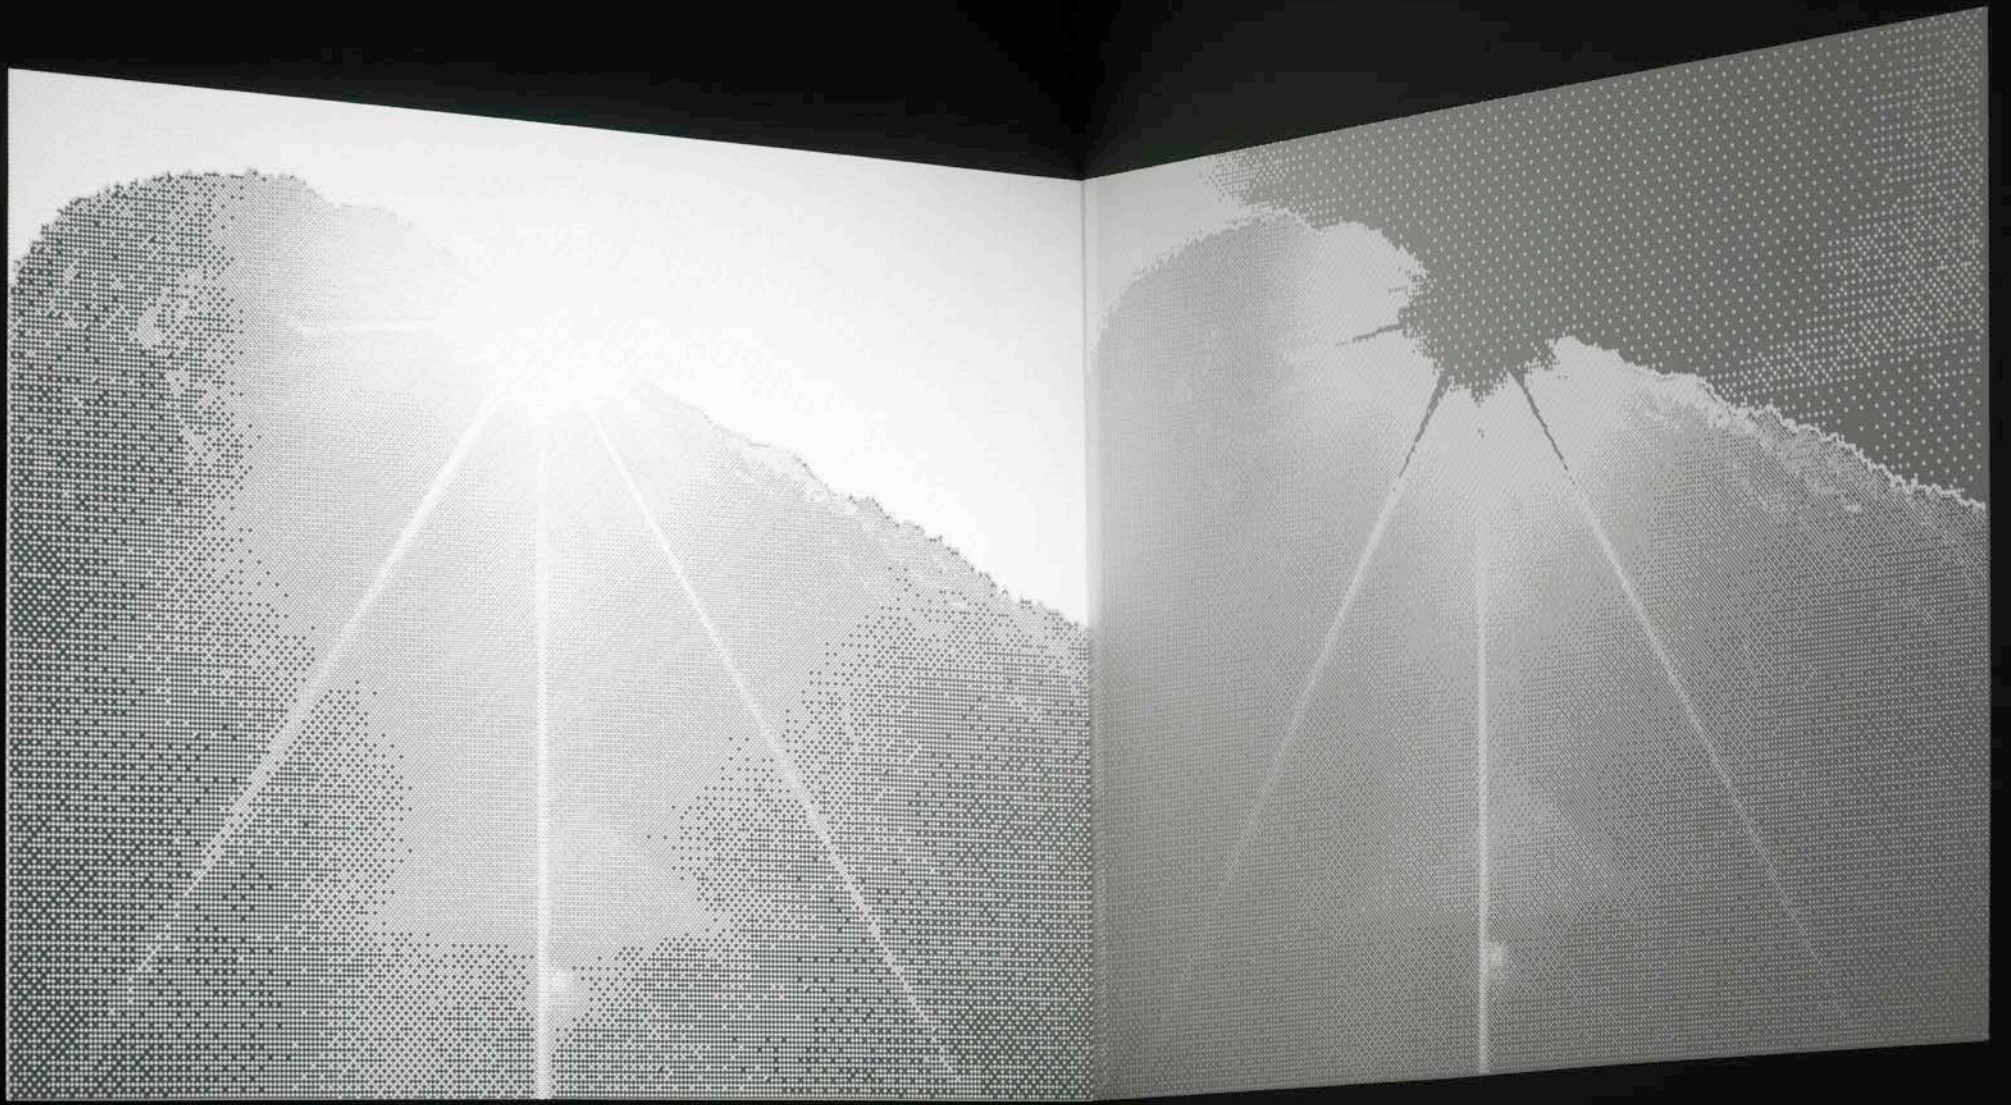

In 1802, north american astronomer and mathematician Nathaniel Bowditch correlated the letters of the alphabet with the 24 timezones dividing the globe, creating a system that is still in use today in navigation.
